DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 6, 9-10, 13, 16-18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishiguchi et al (6503629).

'629 teaches a cationic coating composition for metal that comprises an epoxy resin identical to that of (B) in claim 13 (see Abstract), a polyisocyanate blocked with propylene glycol (6:16-47) and bismuth hydroxide (7:5-113). The thickness of the coating on the metal is 10-40 microns (8:4-14), which overlaps that claimed by applicant.

'629 does not disclose the O₂ permeability or T_g, but because the composition is virtually the same as that claimed by applicant, these parameters would inherently be the same.
